Subject Index

Acrylic diblock copolymers, 299
Adsorbed layers, 229
Adsorbed polymer solutions, 133
Adsorbed polymers, 103, 263, 275
Adsorption, 47, 91, 137, 143, 185, 193, 251, 283, 299, 317
Air/water interface, 171
Aluminium oxide surfaces, 299
Asymptotic salt solution, 11
Atomistic simulation, 125

Block copolymer, 171
Block copolymer layers, 47

β-Casein, 193
Cellulosic fibres, 201
Chain stiffness, 61
Confined polymer layers, 291
Copolymers, 41
Coverage, 229

Density profiles, 165
Desorption, 251, 283
Diblock copolymers, 143
Dispersions, 239
Dynamic light scattering, 209, 229, 255
Dynamic properties, 85

Ellipsometry, 143
Emulsion, 317
End-absorbed polystyrene, 155

Filler particles, 201
Flocculation, 239

Grafted homopolymers, 111
Grafted layers, 85

"Hairy particles", 239
Hydrodynamics, 275

Instability, 239
Interaction forces, 47
Interfaces, 41
Ionic strength, 229

Kinetics, 251, 255

Latex, 317
Layer thickness, 317
Liquid/liquid interface, 125
Loop statistics, 133

Mean field theory, 311
Mean-field calculations, 85
Mica, 47
Micropores, 263
Mixed solvent, 77
Model, 25
Modeling, 111
Modelling, 137
Molecular transport, 263
Molecular volume effects, 25
Monolayers, 171

Nearest neighbour interactions, 61
Nematic interactions, 61
Neutron reflection, 185, 311
Neutron reflectivity, 155
Neutron reflectometry, 103, 165, 171
Neutron scattering, 91
NMR, 193

Orientation, 295

PEO-coated latex particles, 209
Phase behaviour, 137
Planar polyelectrolyte brush, 11
Pluronic block copolymers, 137
Polyethylene oxide–polypropylene oxide, 317
Polyisoprene, 295
Polymer, 239, 251, 283
Polymer adsorption, 25
Polymer blends, 311
Polymer brush, 77
Polymer brushes, 61, 63
Polymer film, 165
Polymer transfer, 201
Polymers, 41, 85
Polystyrene, 185
Polystyrene latex, 229
Polystyrene melts, 155

Poly(2-vinylpyridine)-b-polystyrene, 91
Poly(ethylene oxide), 171
Poly(methyl methacrylate), 171

Rheological properties, 283
Rheology, 317

Scheutjens–Fleer theory, 11
Segment density profiles, 155
Segment interaction, 311
Self-consistent field theory, 11, 25
Shear, 63
Shear flow, 295
Short-chain polymers, 125
Silica, 185, 229
Silica dispersions, 193
Silica suspensions, 283
Solvent quality, 111
Surface force studies, 91
Surface plasmon resonance, 299
Surface quasi-elastic light scattering, 171
Surface tension, 311
Suspensions, 209

Telechelic polymer chains, 255
Theta temperature, 185
Thin film formation, 143
Transport, 255
Triblock copolymers, 143, 317

Viscoelasticity, 317
Viscoelastic properties, 291
Volume fraction profiles, 103
